

HIGHLIGHTS OF HUMANITARIAN SITUATION AND RESPONSE

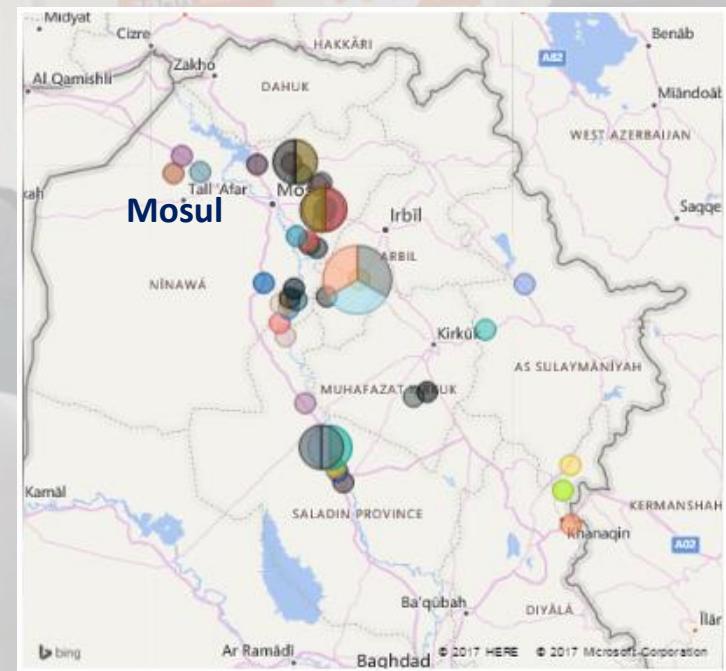

Weekly report #42: 19 – 25 February 2017

As of 25 February 2017, some 1632,896 people were living in displacement from the East and the West parts of the city of Mosul.

In Qayarra and Jadaa camps, currently receiving IDPs, and currently hosting 8,000 families (50,000 individuals), UNFPA supports a delivery room and a mobile RH clinic. Hourly shuttles are also available to move the women seeking services to the delivery room. The delivery room also has a woman safe space attached to it, providing psychosocial support and case management services to GBV survivors. Qayarra hospital maternity also started functioning. UNFPA supported the clearance of the first floor of the hospital which was filled with rubble and supported the maternity department with equipment, supplies, kits, and incentives for staff. The hospital is currently the only CEmONC facility between Mosul and Tikrit.

In Hammam Aleel camp that will accommodate 4,000 families, UNFPA is supporting a reproductive health clinic and also building a field maternity hospital which will be running by the end of March. Another field maternity hospital is currently being built in Athba, west of Mosul expected to be running by mid-March. Also in the West, in Tal Abta, close to Telafar, UNFPA has supported the deployment of a mobile delivery unit. This unit will be deployed closer to Tel Aafar once the areas are accessible.

On the East side of Mosul, where approximately 750,000 people still reside (source: Mayor of Mosul), UNFPA started supporting 3 new RH clinics by revitalizing the facilities, providing medicines, supplies and incentives to providers. UNFPA also supported the revitalization of part of Al Khansaa maternity hospital which was less severely damaged. The maternity will be the only facility providing CEmONC in Eastern Mosul, after most of it was burnt during the military operations.

REPRODUCTIVE HEALTH RESPONSE HIGHLIGHTS

30 RH clinics are supported to provide reproductive health services

6,585 Reproductive health consultations were conducted in Ninewa (Mosul), Erbil, Kirkuk and Salahadin areas

115 Assisted deliveries were conducted in Ninewa (Mosul) area
