

LIBYA

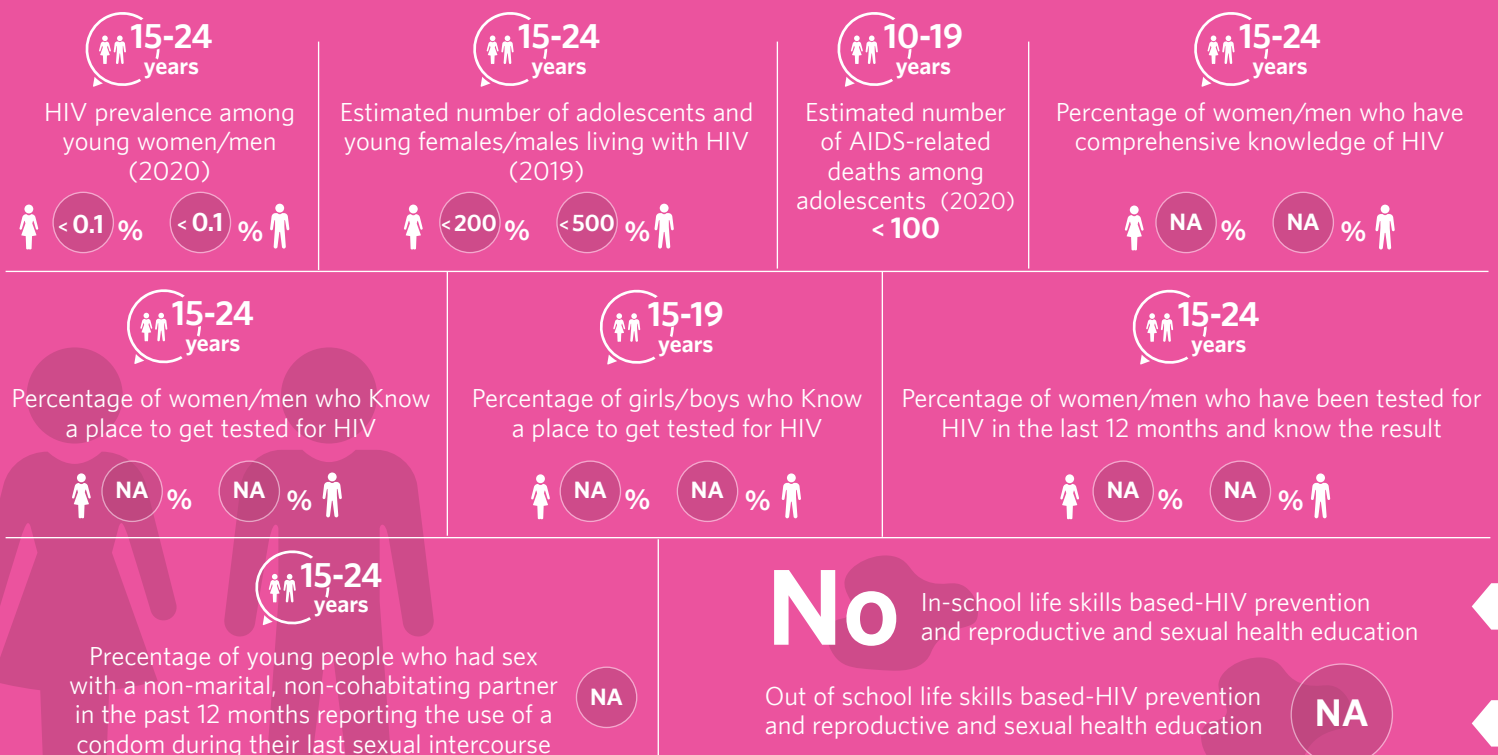

The prevalence among the general population (15-49 years, 2019) is 0.2%. The epidemic in Libya is primarily concentrated among Key populations. Education policies guiding delivery of Life Skills based HIV and sexuality education, according to international standards, do not exist neither in primary nor secondary schools or teacher training. Laws do not require parental consent for adolescents younger than 18 years to access Sexual Reproductive Health, HIV testing and HIV treatment. Young people do not participate in policy/guidelines/strategy development related to their health. Data is either not available, or not accessible or outdated.

Demographics/ population data

Adolescents and young people, HIV/AIDS (knowledge, testing, treatment)
