

SULTANATE OF OMAN

- Total population (millions)(2020) **4.528,000**
- Population aged 10-24 (%) (2020) **8.68**
- HIV prevalence among people aged 15-49 years (2020) **< 0.1**
- HIV prevalence among people aged 15-24 years (2020) **< 0.1**

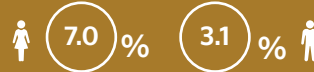

The prevalence among the general population (15-49 years, 2019) is less than 0.1%. In-depth HIV/STIs knowledge on modes of transmission and prevention remains very low among young people. Education policies guiding delivery of Life Skills based HIV and sexuality education, according to international standards, exist only in secondary school (fully implemented by 51-75%) and no teacher training. Laws requiring parental consent for adolescents younger than 12 years to access HIV testing. Young people do not participate in policy/guidelines/strategy development related to their health nor in the national HIV response. Data remains scarce, or not accessible.

Demographics/ population data

- Adolescent girls/boys (10-14 years) (2019)

- Adolescent girls/boys (15-19 years) (2019)

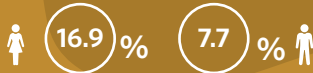

- Literacy rate among adult females/males (15 years and over) (2019)

- Literacy rate among young females/males (15-24 years) (2018)

- Rate of out of school young female/male of upper secondary school age (2018)

- Young female/male unemployment (15-24 years) (2020)

Adolescents and young people, HIV/AIDS (knowledge, testing, treatment)

15-24 years

HIV prevalence among young women/men (2020)

15-24 years

Estimated number of adolescents and young females/males living with HIV (2019)

10-19 years

Estimated number of AIDS-related deaths among adolescents

NA

15-24 years

Percentage of women/men who have comprehensive knowledge of HIV (2014)

15-24 years

Percentage of women/men who Know a place to get tested for HIV (2014)

15-19 years

Percentage of girls/boys who Know a place to get tested for HIV (2014)

15-24 years

Percentage of women/men who have been tested for HIV in the last 12 months and know the result (2014)
