

## REPUBLIC OF THE SUDAN

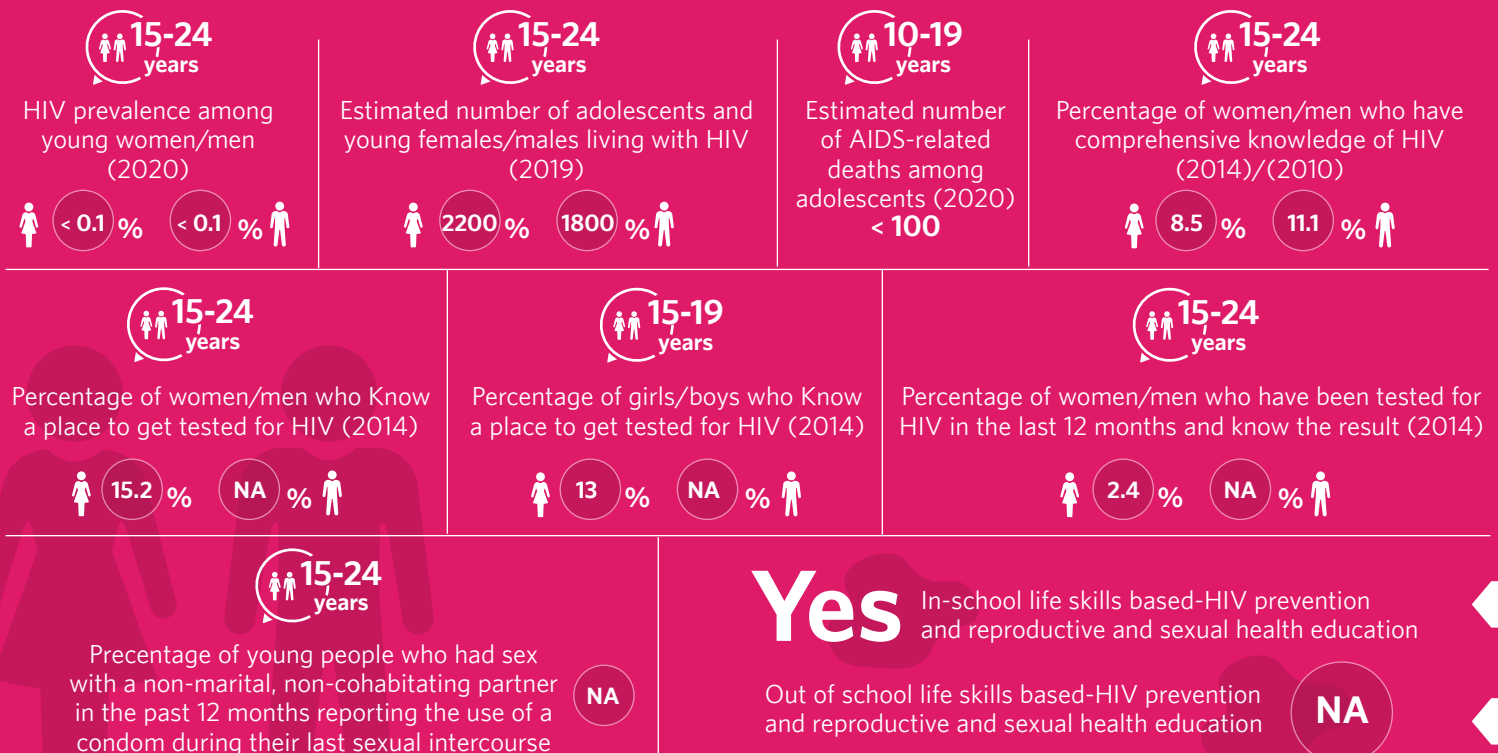

- Total population (millions)(2019) **42,813,238**
- Population aged 10-24 (%) **32.6**
- HIV prevalence among people aged 15-49 years (2020) **0.2**
- HIV prevalence among people aged 15-24 years (2020) **< 0.1**

The prevalence among the general population (15-49 years, 2019) is 0.2%. However, higher prevalence rates among key populations Sex Workers (SWs), Men having Sex with Men (MSMs) is reported. In-depth HIV/STIs knowledge on modes of transmission and prevention remains very low among young people. Education policies guiding delivery of Life Skills based HIV and sexuality education, according to international standards, exists in primary and secondary school and in teacher training. Laws do not require parental consent for adolescents younger than 18 years to access Sexual Reproductive Health, and HIV treatment. It is required for access to HIV testing. Young people participate in policy/guidelines/strategy development related to their health in National AIDS Coordinating Authority or equivalent, with a broad-based multi-sector mandate, and in Civil Society coordination spaces of populations most affected by HIV. Data is either inexistent or inaccessible and outdated.

## Demographics/ population data

## Adolescents and young people, HIV/AIDS (knowledge, testing, treatment)
